- Modified Objects 4
- 1-1QYK71 4
- New object 5

- Problem Resolutions** 6

Introduction

This release guide documents release 8.6 of Banner® Web General. Release 8.6 includes enhancements and problem resolutions since release 8.5.2.

RPE

The following RPEs were addressed in this release:

- 1-1BGHWI1 - enable Global Proxy Access configuration settings on GERCOMM
- 1-1QYK71 - prevent users from entering carriage returns and line feeds in addresses

1-1BGHWI

The Proxy Access Communication Rule (GERCOMM) form has been enhanced to enable the *New Proxy* and *Delete Proxy* communication settings for Global Proxy Access to be configured.

Note: By default, the **Send e-mail?** checkbox for the Person Letter Code is not selected for the Global Proxy Access System Code.

Modified Objects

- bwgkprxy1.sql
- bwgkpxya1.sql
- bwgkpxym1.sql

1-1QYK71

Addresses entered via Self-Service Banner occasionally contain a carriage return or line feed which are not handled properly by other institutions.

New object

- goksels.f_clean_text

The goksels.f_clean_text function performs the following tasks:

1. Replace tabs chr(09) with a space.
2. Replace new line chr(10) with a space.
3. Replace vertical tab chr(11) with a space.
4. Replace form feed chr(12) with a space.
5. Replace carriage return chr(13) with a space.
6. Replace smart single left quote chr(14844056) and smart single right quote chr(14844057) with a standard single quote (').
7. Replace smart double left quote chr(14844060) and smart double right quote chr(14844061) with a standard double quote (").
8. Trim leading and trailing spaces.

Note: Any user defined substitutions created in GTVSDAX will also be performed, but these are not delivered

Note: This RPE only affects address data being entered via General Address updates. Any other location that allows address information to be input will need to be modified to call the new goksels.f_clean_text function.

Any extracts that will be sent to the Department of Education should call the goksels.f_clean_text function to ensure that any data that is sent is trimmed appropriately.

Problem Resolutions

At the time this guide was completed, the following problem resolutions were targeted for delivery with this release.

Note: For comprehensive and detailed problem, impact, and resolution information for all defects corrected in this release, refer to the supplemental problem resolutions file (`genweb80600resolutions.txt`) delivered along with your release guide. The information in this text file is extracted directly from the Customer Support Center just prior to release of the product and may include additional defects that were resolved after this document was finalized.

Object	Number	Summary
bwgkprxy1.sql twbkwbi1.sql twgrinfoi_080600.sql	1-15QA3IH	Logged out of the Proxy pages when the URL not enabled for the proxy role. Should display error.
