# Introduction

---

This guide documents Release 8.4.1 of the Banner Financial Aid System. The Banner Financial Aid 8.4.1 release is an entirely optional release that permanently deletes data and obsoletes tables that are no longer used by Banner Financial Aid baseline processing. This upgrade will not be incorporated into the Banner Financial Aid 8.5 release, or any future release, but may be applied, at your institution's discretion, to any Banner Financial Aid release after 8.4. Furthermore, it does not contain any Banner Financial Aid 8.4 patches posted through Electronic Distribution following the Banner Financial Aid 8.4 release in April 2009.

The following updates are included in this release.

## ***Database Cleanup Enhancement***

The functional and technical sections in this release guide discuss the modifications made to provide you with the ability to truncate and obsolete table structures that have not been utilized by the baseline Banner Financial Aid product for many years and will never be used again.

### **Warning**

Unlike prior Financial Aid Upgrades, the installation of Banner Financial Aid Release 8.4.1 permanently deletes institutional data in tables that are no longer used by baseline processing. Because this data may still be used by your own institutional processing, or may need to be retained to comply with your institutional data retention guidelines, you should review the tables listed in the technical section prior to applying this release. ■

### **Note**

**New Information:** Any release hints, suggestions, or corrections to this release guide that come up subsequent to the posting of this release will be documented in the *What are helpful hints and suggestions for using Banner Financial Aid 8.4.1?*, Solution/FAQ #1-5LSJJ9, and made available through the Customer Support Center ([https://connect.sungardhe.com/customer\\_support](https://connect.sungardhe.com/customer_support)). It is recommended that you refer to this document periodically under Solutions/FAQs (#1-5LSJJ9) as you use the new release functionality. ■

# 1 Database Cleanup Enhancement - Functional

## Overview

---

The Database Cleanup enhancement allows you to truncate and obsolete table structures that have not been utilized by the baseline Banner Financial Aid product for many years and will never be used again. The data existing in the tables listed in the Technical section will be permanently deleted. An option to export the tables is provided as part of the release upgrade.

The complete list of obsolete data structures is included in the *Database Cleanup Enhancement - Technical* section.

### **Warning**

Unlike prior Financial Aid Upgrades, the installation of Banner Financial Aid Release 8.4.1 permanently deletes institutional data in tables that are no longer used by baseline processing. Because this data may still be used by your own institutional processing, or may need to be retained to comply with your institutional data retention guidelines, you should review the tables listed in the technical section prior to applying this release. ■

# 2 Database Cleanup Enhancement - Technical

## Obsolete Data Structures

The following data structures are now obsolete. An export of all affected tables is included as an optional step in the 8.4.1 upgrade. Since the data in these tables will be removed, you should review these tables to verify that the tables are not being utilized for any other institutional purposes. Please refer to the *Banner Financial Aid 8.4.1 Upgrade Guide* for more information.

### Applicant NSLDS Table Part 1 (RCRLDS1)

## Temporary Satisfactory Academic Rules Table (ROTSAPR)

ROTSAPR is a temporary table that was used by dataload processing to store temporary initial satisfactory progress record data prior to record being loaded to production by RCRTPxx. As of the 8.0 release, the RORSTAT API is used to create the initial satisfactory progress record for current year processing. Modifications were made in the 8.4 release to also use the RORSTAT API for all prior year data loads.

The comment on table was modified to: *This table is no longer used by Banner.* The table was truncated to remove all rows. All referential integrity constraints associated with the table were dropped. All indexes associated with the table were dropped.
