Business Rule Process Code Validation Form (GTVSQPR)	22
Business Rules Form (GORRSQL)	23
Crosswalk Validation Form (GTVSDAX)	54
MEP Rules Form (GUAMEPR)	55
Templates tab	55
Objects tab.	55
 Section 6 Problem Resolutions	 57

1 Introduction

This release guide documents Release 8.4.1 of the Banner General System. Release 8.4.1 includes enhancements, RPEs, and problem resolutions.

Enhancements for 8.4.1

The following enhancements were made for 8.4.1.

Multi-Entity Processing enhancements

The enhancement provides institutions the ability to add VPDI code and policies to an environment that does have Multi-Entity Processing functionality. This enhancement only provides only the ability to add policies to Banner ERP products and modules.

Miscellaneous enhancement

This section contains detail on the enhancement for Institution selector icon.

Cumulative documentation and patches

This document provides detailed information about the Banner General 8.4.1 release only. Banner General 8.4.1 is a cumulative release that also includes enhancements, RPEs, and problem resolutions delivered in the General 8.4.0.1 and 8.4.0.2 releases. For complete documentation about these interim releases, please refer to the interim release guides identified in the table at the end of this section.

This table summarizes the interim releases which are included in Release 8.4.1. Refer to the associated release guides for additional release documentation.

Release/Patch Number	Contents	Release Date
p1-e13ysd_gen8040001	Defect posting	February 03, 2011
p1-HY1ID3_gen8040002	Defect posting	February 11, 2011

System requirements

You must install Banner General 8.4 before upgrading to Banner General 8.4.1.

2 Multi-Entity Processing Enhancements - Functional

Overview

This section describes the functional enhancements for Multi-Entity Processing in Banner General 8.4.1. A new form was added. The MEP Rules Form (GUAMEPR) allows institutions to easily create maintain, and apply Multi-Entity Processing functionality. The form is used to identify the tables that should have Multi-Entity Processing functionality applied.

Note

The *Multi-Entity Processing Handbook* has more information about Multi-Entity Processing. A beta version of the handbook is available upon request. To request a copy, open a service request through the Customer Support Center. ■

New form

The following form was added to support the technical enhancements for Multi-Entity Processing.

MEP Rules Form - GUAMEPR

This form allows the creation, maintenance, and application of policies for Multi-Entity Processing. The form enables an institution to define the tables for which the data needs to be segregated. Segregation can be done by defining a template of tables manually or using the delivered templates. The form then generates scripts that can be executed to apply the necessary changes to columns, indices, foreign keys, triggers, and policies to implement Multi-Entity Processing.

Key block

You can optionally use the Key Block to search by Owner, Name, and Category.

Fields

The following table describes the fields.

Fields	Descriptions
Owner	The field displays the Oracle ID that owns the table. You can perform a query from this field.
Name	The field displays the name of a specific table that exists in GUBMEPO table.
Category	The field displays a name of a category that exists in GUBMEPO table.

Templates tab

This tab is used to load multiple tables in the **Objects** tab. Rows that are displayed in this tab are defined in the Business Rules Form (GORRSQL).

Fields

The following table describes the fields.

Fields	Descriptions
Category	The field displays the Category code associated with the policies.
Status	<p>The column shows the number of rules that match from the Templates tab with the rules on the Objects tab. The following statuses can be displayed:</p> <ul style="list-style-type: none">• <i>All <number of tables> match</i> - All rules from the Templates and Objects tabs match for all tables.• <i><number of tables>/<number of tables> Different</i> - There are no tables on the Objects tab that are defined by this template.• <i><number of different tables>/<number of tables> Different</i> - Some rules on the Templates tab match with some rules on the Objects tab.
User ID	The User ID of the last user to update the rule in the GORRSQL form that associate with the row displayed.
Activity Date	The date when the rule was last updated in the GORRSQL form.
Default Access	The header only for Owner , All , and User fields.
Owner	The level of access associated with a user who has the same VPDI code as the data in the table. The access level is controlled by the BY_OWNER policy.

Fields	Descriptions
All	The level of access associated with a user who has the same VPDI code as the data in the table. The access level is controlled by the BY_ALL policy.
User	The level of access associated with a user who has the same VPDI code as the data in the table. The access level is controlled by the BY_USER policy.

Buttons

The following table describes the buttons on the **Templates** tab.

Button	Description
View Tables	The button lists the tables defined by the GORRSQL rule along with the currently defined rules on the Objects tab.
Add Table	The button adds the tables with the respective default access to the Objects tab for any table in that rule which does not exist.
Replace Table	The button adds the tables with the respective default access to the Objects tab for any table in a rule that does not exist and replaces the rule for any entry that does exist.
Delete Tables	The button deletes the tables from the Objects tab for any table in a rule that currently exists but does not have the In Keys option checked. If the In Keys option is checked, VPDI code has been added to at least one of the keys or indices of that table.

Objects tab

This tab is used to refine the rules established from the **Templates** tab as needed. This information is used by the scripts (defined in the next section) that enable Multi-Entity Processing functionality.

Fields

The following table describes the fields.

Fields	Descriptions
Table Owner	The schema owner of the table.
Table/View Name	The name of the table.
Category	The category that groups several tables together.

Fields	Descriptions
System Code	The GTVSYSI code that indicates the product to which this table belongs.
System Name	A translation of the system code.
User ID	The User ID of the last user to update this record.
Activity Date	The date when this record was last inserted or updated.
Owner	The level of access associated with a user who has the same VPDI code as the data in the table, which is controlled by the BY_OWNER policy.
All	The level of access associated with a user who has the same VPDI code as the data in the table, which is controlled by the BY_ALL policy.
User	The level of access associated with a user who has the same VPDI code as the data in the table, which is controlled by the BY_USER policy.
VPDI Column	If this option is checked, a column with the name of <table_name>_VPDI_CODE is defined.
In Keys	If this option is checked, a column with the name of <table_name>_VPDI_CODE is defined and is included in at least one of the keys or indices for the table.
Policy Name	<p>If a VPDI policy exists for the table, the policy associated with the table if a policy exists is displayed.</p> <p>The VPDI policies names are formatted as <table>_VPDI_<type of access>_POLICY. The <type of access> value represents these values:</p> <ul style="list-style-type: none"> • S for Select or Query • I for Insert • U for Update • D for Delete <p>ARAAWD_VPDI_SIUD_POLICY is an example that uses these values.</p>
Policy Group	If a policy exists for the table, the group to which that policy belongs is displayed.
Select	If this option is checked, a policy exists for the table, and the policy is associate with Query or Select.

Fields	Descriptions
Insert	If this option is checked, a policy exists for the table, and the policy is associate with Insert.
Update	If this option is checked, a policy exists for the table, and the policy is associate with Update.
Delete	If this option is checked, a policy exists for the table and the policy is associate with Delete.
Static	If this option is checked, a policy exists for the table, and the policy is defined as STATIC.
Enabled	If this option is checked, a policy exists for the table, and the policy is enabled.
Check Option	If this option is checked, a policy exists for the table, and the policy has the CHECK OPTION enabled.
Policy Owner	If a policy exists for the table, the schema owner of that policy is displayed.
Package	If a policy exists for the table, the name of the package associated with that policy is displayed.
Function	If a policy exists for the table, the name of the function in the package that is associated with that policy is displayed.

Buttons

The following table describes the buttons.

Button	Description
View Alter Table Script	This button displays the script that will be created by the <code>gmep_genvpid</code> and <code>gmep_genindex</code> scripts.
View Policy Create Script	This button displays the script that will be created by the <code>gmep_genpolicy</code> script.
View Trigger Create Script	This button displays the script that will be generated by the <code>gmep_genttrigger</code> script.
View Source Code	This button displays the source code of the policy.

Defaults tab

This tab identifies functions that will be used for generating policies.

Fields

The following table describes the fields.

Fields	Descriptions
Owner	The owner of the package used by the By Owner Policy, By All Policy, and By User Policy.
Package Name	The package name used by the By Owner Policy, By All Policy, and By User Policy.
Function Name	The function name used by By Owner Policy, By All Policy, and By User Policy.
User ID	User ID of the last user to insert or update this record.
Activity Date	The date when this record was last inserted or updated.

3 Multi-Entity Processing Enhancements - Technical

Overview

This section describes the technical enhancements made to Multi-Entity Processing in Banner General 8.4.1. Several new tables, scripts, and seed data were added. These technical enhancements benefit institutions in that VPDI code and policies can be added to tables en masse to enable Multi-Entity Processing functionality.

The technical enhancements for Multi-Entity Processing allow multiple campuses to share a common database. The data for each campus is specified by a VPDI_CODE on each row of each table that has a campus specific value (for example, CAMP1, MAIN, CAMP2). In cases where tables are shared across all campuses, no a VPDI_CODE needs to added since there is no need to segregate the data.

New tables

The following tables are delivered as part of the Banner General 8.4.1 upgrade for Multi-Entity Processing:

- Multi-Entity Processing Objects Table (GUBMEPO)
- Multi-Entity Processing Policy Default Table (GUBMEPD)
- Multi-Entity Processing Privileges Validation Table (GTVMEPP)

New scripts

There are several scripts that are used to add Multi-Entity Processing to a table. The following table describes the scripts.

Script	Results
<code>gmep_applyseed.sql</code>	This script generates a script to apply another script multiple times to a table for each GTVVPDI code.
<code>gmep_copy_gubinst.sql</code>	This script replicates the GUBINST data across all VPDI codes.
<code>gmep_gendata.sql</code>	This script replicates data from one VPDI code to all the others defined on the GTVVPDI form.
<code>gmep_gendisable.sql</code>	This script generates two scripts that disables all Banner tables before adding Multi-Entity Processing and enables the triggers once the process is complete.
<code>gmep_genindex.sql</code>	This script generates the scripts that add the VPDI column to the indices, foreign keys, unique indices, and primary keys as needed.
<code>gmep_genpolicy.sql</code>	This script generates the scripts that add the policies to the tables.
<code>gmep_genttrigger.sql</code>	This script generates the scripts that add the triggers for populating the VPDI code for tables.
<code>gmep_genvpdi.sql</code>	This script generates the scripts that add the VPDI column to tables.

4 Miscellaneous Enhancements

The following miscellaneous enhancement is included in this release.

RPEs

This section describes the RPE for General 8.4.1.

Update hover over Institution select icon (RPE 1-HNVO97)

GOQWFLW.p11, GOQRPLS.p11, GUMAPPL.mmb

Previously, the hover over for Institution select icon read “Multi-Institution not enabled” when Multi-Entity Processing was not enabled. The hover over now reads-“Multi-Entity Processing not enabled.”

5 Seed Data

This section describes the seed data delivered with Release 8.4.1.

Business Rule Code Validation Form (GTVSQRU)

The following table describes the new values for the Business Rule Code Validation Form (GTVSQRU). The `gtvsqrui_080401.sql` script loads the rule validation values for each product and application category code.

Code	Description	System Required	Start Date	End Date
MEP_ACCTRECV_FIN_AR	MEP rules for Accounts Receivable Finance A/R tables	N	initial load date	
MEP_ACCTRECV_GEN_AR	MEP rules for Accounts Receivable General A/R tables	N	initial load date	
MEP_ACCTRECV_LOCALIZATIONS	MEP rules for Accounts Receivable Localizations tables	N	initial load date	
MEP_ACCTRECV_OVERALL	MEP rules for Accounts Receivable Overall tables	N	initial load date	
MEP_ACCTRECV_RESEARCH_ACCTG	MEP rules for Accounts Receivable Research Accounting tables	N	initial load date	
MEP_ACCTRECV_STU_AR	MEP rules for Accounts Receivable Student A/R tables	N	initial load date	
MEP_ACCTRECV_UTILITY	MEP rules for Accounts Receivable Utility tables	N	initial load date	
MEP_ADVANCEMENT_CAMPAIGN	MEP rules for Advancement Campaign tables	N	initial load date	
MEP_ADVANCEMENT_CONSTITUENT	MEP rules for Advancement Constituent/Person tables	N	initial load date	
MEP_ADVANCEMENT_DESIGNATION	MEP rules for Advancement Designation tables	N	initial load date	

Code	Description	System Required	Start Date	End Date
MEP_ADVANCEMENT_EVENT_MGMT	MEP rules for Advancement Event Management tables	N	initial load date	
MEP_ADVANCEMENT_EXPECTED_GIFT	MEP rules for Advancement Expected Matching Gift tables	N	initial load date	
MEP_ADVANCEMENT_LABEL	MEP rules for Advancement Label tables	N	initial load date	
MEP_ADVANCEMENT_LOCALIZATIONS	MEP rules for Advancement Localizations tables	N	initial load date	
MEP_ADVANCEMENT_MEMBERSHIP	MEP rules for Advancement Membership tables	N	initial load date	
MEP_ADVANCEMENT_ORGANIZATION	MEP rules for Advancement Organization tables	N	initial load date	
MEP_ADVANCEMENT_PLEDGES	MEP rules for Advancement Pledge and Gift Payment tables	N	initial load date	
MEP_ADVANCEMENT_PROSPECT_MGMT	MEP rules for Advancement Prospect Management tables	N	initial load date	
MEP_ADVANCEMENT_SOLICITOR_ORGS	MEP rules for Advancement Solicitor Organization tables	N	initial load date	
MEP_ADVANCEMENT_UTILITY	MEP rules for Advancement Utility tables	N	initial load date	
MEP_BDMS_BDMS	MEP rules for BDMS BDMS tables	N	initial load date	
MEP_FINAID_BUDGETING	MEP rules for Financial Aid Budgeting tables	N	initial load date	
MEP_FINAID_COMMON_FUNCTIONS	MEP rules for Financial Aid Common Functions tables	N	initial load date	
MEP_FINAID_EDE	MEP rules for Financial Aid Electronic Data Exchange tables	N	initial load date	
MEP_FINAID_FUNDS_MGMT	MEP rules for Financial Aid Funds Management tables	N	initial load date	
MEP_FINAID_HISTORY	MEP rules for Financial Aid History and Transcripts tables	N	initial load date	
MEP_FINAID_LOCALIZATIONS	MEP rules for Financial Aid Localizations tables	N	initial load date	
MEP_FINAID_LOGGING	MEP rules for Financial Aid Logging tables	N	initial load date	
MEP_FINAID_NEED_ANALYSIS	MEP rules for Financial Aid Need Analysis tables	N	initial load date	

Code	Description	System Required	Start Date	End Date
MEP_FINAID_PCKNG_DISB	MEP rules for Financial Aid Packaging / Disbursements tables	N	initial load date	
MEP_FINAID_RECORD_CREATION	MEP rules for Financial Aid Record Creation tables	N	initial load date	
MEP_FINAID_REQ_TRACKING	MEP rules for Financial Aid Requirements Tracking tables	N	initial load date	
MEP_FINAID_STUDENT_SHARED	MEP rules for Financial Aid Student Shared Data tables	N	initial load date	
MEP_FINAID_STU_EMPLOYMENT	MEP rules for Financial Aid Student Employment tables	N	initial load date	
MEP_FINAID_UTILITY	MEP rules for Financial Aid Utility tables	N	initial load date	
MEP_FINANCE_AP	MEP rules for Finance Accounts Payable tables	N	initial load date	
MEP_FINANCE_ARCHIVE	MEP rules for Finance Archive/Purge tables	N	initial load date	
MEP_FINANCE_BUDGET	MEP rules for Finance Budget Development tables	N	initial load date	
MEP_FINANCE_COST_ACCOUNTING	MEP rules for Finance Cost Accounting tables	N	initial load date	
MEP_FINANCE_EDI	MEP rules for Finance Electronic Data Interchange tables	N	initial load date	
MEP_FINANCE_ENDOWMENT_MGMT	MEP rules for Finance Endowment Management tables	N	initial load date	
MEP_FINANCE_FIXED_ASSETS	MEP rules for Finance Fixed Assets tables	N	initial load date	
MEP_FINANCE_GENERAL_LEDGER	MEP rules for Finance General Ledger tables	N	initial load date	
MEP_FINANCE_INVESTMENT_MGMT	MEP rules for Finance Investment Management tables	N	initial load date	
MEP_FINANCE_LOCALIZATIONS	MEP rules for Finance Localizations tables	N	initial load date	
MEP_FINANCE_OPERATIONS	MEP rules for Finance Operations tables	N	initial load date	
MEP_FINANCE_PURCHASING	MEP rules for Finance Purchasing/Procurement tables	N	initial load date	
MEP_FINANCE_RESEARCH_ACCT	MEP rules for Finance Research Accounting tables	N	initial load date	

Code	Description	System Required	Start Date	End Date
MEP_FINANCE_STORES	MEP rules for Finance Stores Inventory tables	N	initial load date	
MEP_FINANCE_UTILITY	MEP rules for Finance Utility tables	N	initial load date	
MEP_FLEXREG	MEP rules for Flexible Registration tables	N	initial load date	
MEP_GENERAL_CROSS_PRODUCT	MEP rules for General Cross product tables	N	initial load date	
MEP_GENERAL_EVENT_MGMT	MEP rules for General Event Management tables	N	initial load date	
MEP_GENERAL_LETTER_GEN	MEP rules for General Letter Generation tables	N	initial load date	
MEP_GENERAL_LOCALIZATIONS	MEP rules for General Localizations tables	N	initial load date	
MEP_GENERAL_OVERALL	MEP rules for General Overall tables	N	initial load date	
MEP_GENERAL_PURGE	MEP rules for General Purge tables	N	initial load date	
MEP_GENERAL_UTILITY	MEP rules for General Utility tables	N	initial load date	
MEP_HR_APPLICATION	MEP rules for Human Resources Application tables	N	initial load date	
MEP_HR_APPROVALS	MEP rules for Human Resources Electronic Approvals tables	N	initial load date	
MEP_HR_BUDGET	MEP rules for Human Resources Budget tables	N	initial load date	
MEP_HR_COBRA	MEP rules for Human Resources COBRA tables	N	initial load date	
MEP_HR_DED_BEN	MEP rules for Human Resources Benefit/Deductions tables	N	initial load date	
MEP_HR_EMPLOYEE	MEP rules for Human Resources Employee tables	N	initial load date	
MEP_HR_LOCALIZATIONS	MEP rules for Human Resources Localizations tables	N	initial load date	
MEP_HR_OVERALL	MEP rules for Human Resources Overall tables	N	initial load date	
MEP_HR_PERSON	MEP rules for Human Resources General Person tables	N	initial load date	

Code	Description	System Required	Start Date	End Date
MEP_HR_TAX	MEP rules for Human Resources Tax Administration tables	N	initial load date	
MEP_HR_TIME_REPORTING	MEP rules for Human Resources Time Reporting/History tables	N	initial load date	
MEP_HR_UTILITY	MEP rules for Human Resources Utility tables	N	initial load date	
MEP_POSCTL_APPLICATION	MEP rules for Position Control Application tables	N	initial load date	
MEP_POSCTL_APPROVALS	MEP rules for Position Control Electronic Approvals tables	N	initial load date	
MEP_POSCTL_BUDGET	MEP rules for Position Control Budget tables	N	initial load date	
MEP_POSCTL_COBRA	MEP rules for Position Control COBRA tables	N	initial load date	
MEP_POSCTL_DED_BEN	MEP rules for Position Control Benefit/Deductions tables	N	initial load date	
MEP_POSCTL_EMPLOYEE	MEP rules for Position Control Employee tables	N	initial load date	
MEP_POSCTL_LOCALIZATIONS	MEP rules for Position Control Localizations tables	N	initial load date	
MEP_POSCTL_OVERALL	MEP rules for Position Control Overall tables	N	initial load date	
MEP_POSCTL_PERSON	MEP rules for Position Control General Person tables	N	initial load date	
MEP_POSCTL_TAX	MEP rules for Position Control Tax Administration tables	N	initial load date	
MEP_POSCTL_TIME_REPORTING	MEP rules for Position Control Time Reporting/History tables	N	initial load date	
MEP_POSCTL_UTILITY	MEP rules for Position Control Utility tables	N	initial load date	
MEP_STUDENT_ADMISSIONS	MEP rules for Student Admissions tables	N	initial load date	
MEP_STUDENT_CAPP	MEP rules for Student CAPP tables	N	initial load date	
MEP_STUDENT_CATALOG	MEP rules for Student Catalog tables	N	initial load date	

Code	Description	System Required	Start Date	End Date
MEP_STUDENT_FACULTY_LOAD	MEP rules for Student Faculty Load tables	N	initial load date	
MEP_STUDENT_GRADES	MEP rules for Student Grades/Academic History tables	N	initial load date	
MEP_STUDENT_LOCALIZATIONS	MEP rules for Student Localizations tables	N	initial load date	
MEP_STUDENT_LOCATION_MGMT	MEP rules for Student Location Management tables	N	initial load date	
MEP_STUDENT_OVERALL	MEP rules for Student Overall tables	N	initial load date	
MEP_STUDENT_PERSON	MEP rules for Student Person tables	N	initial load date	
MEP_STUDENT_RECRUITING	MEP rules for Student Recruiting tables	N	initial load date	
MEP_STUDENT_REG_FEE_ASMNT	MEP rules for Student Registration/Fee Assessment tables	N	initial load date	
MEP_STUDENT_SCHEDULE	MEP rules for Student Schedule tables	N	initial load date	
MEP_STUDENT_STUDENT	MEP rules for Student General Student tables	N	initial load date	
MEP_STUDENT_SUPPORT_SVCS	MEP rules for Student Support Services tables	N	initial load date	
MEP_STUDENT_UTILITY	MEP rules for Student Utility tables	N	initial load date	

Business Rule Process Code Validation Form (GTVSQPR)

The following table describes the new validation value for the Business Rule Process Code Form (GTVSQPR). The `gtvsqpri_080401.sql` script loads the process validation value.

Code	Description	System Required
MEP_RULES	Rules for application segregation within a MEP setup	N

Business Rules Form (GORRSQL)

This section describes the new rules added to Business Rules Form (GORRSQL). The following scripts are used to load the data:

- gorrsqli_080401_01.sql - Loads GORRSQL rules to be used by the Templates tab on the MEP Rules Form.
- gorrsqli_080401_02.sql - Sets the Active and Validated options for the rules on GORRSQL form based on the data that currently exists in your environment.

All new rules are under the MEP_RULES process. The **Active** option is determined by on existing tables.

Rule	Sequence	Active	Validated	Start Date	SQL Statement	Parsed SQL Statement	System Required
MEP_ACCTRECV_FIN_AR	1	Y/N	Y	date loaded	<pre>--TAISMGR Accounts Receivable Finance A/R select owner, table_name, 'T' from all_tables where owner = 'TAISMGR' and table_name like 'TF%' order by owner, table_name"</pre>	<pre>--TAISMGR Accounts Receivable Finance A/R select owner, table_name, 'T' from all_tables where owner = 'TAISMGR' and table_name like 'TF%' order by owner, table_name"</pre>	N

Crosswalk Validation Form (GTVSDAX)

New rules are delivered to use with Multi-Entity Processing. The ggtvsdaxi_080401_01.sql script loads the default values for the AUDIT and PARALLEL rules.

External Code	Internal Code	Internal Group	Description
L	AUDIT	MEP_RULES	MEP audit indicator
CPU	PARALLEL	MEP_RULES	MEP use of parallel on indexes

MEP Rules Form (GUAMEPR)

Along with the new MEP Rules Form (GUAMEPR), new data is delivered for the **Templates** and **Objects** tabs.

Templates tab

The `gubmepdi_080401.sql` script loads the data in the **Templates** tab for Owner / By User Policy, Package Name / By User Policy, and Function Name / By User Policy. The data is loaded to the Multi-Entity Processing Policy Default Table (GUBMEPD).

Objects tab

The following table describes the rules delivered for the **Objects** tab. The `gubmepoi_080401_01.sql` script loads the rules for adding Multi-Entity Processing functionality to the GUBINST table. This data is stored in the Multi-Entity Processing Objects Table (GUBMEPO).

Table/View Name	Table Owner	Category	System Code	Owner	User	All
GUBINST	GENERAL	GUBINST	G	1		

6 Problem Resolutions

The following problem resolutions are delivered with this release.

Note

For comprehensive and detailed problem, impact, and resolution information for all defects corrected in this release, refer to the supplemental problem resolutions file (`general80401resolutions.txt`) delivered along with your release guide. The information in this text file is extracted directly from the Customer Support Center just prior to release of the product and may include additional defects that were resolved after this document was finalized. ■

Object Name	Defect #	Summary
gjirevo.fmb	1-HL5RJJ	In form GJIREVO, the Time Saved field is not working properly.
glaextr.fmb	1-EL3YS	The Next Block from KEY_BLOCK produces the error, “FRM-93652 The runtime process has terminated abnormally ONLY occurs in Forms11g runtime.” The patch p1-e13ysd_gen8040001 was delivered on February 3, 2011.
goamtch.fmb	1-1BEG3H	There is no checking on the SSN number when you are working with Common Matching. No warning message is displayed when you add a person with a SSN, and a SSN exists in the system.
gokisql1.sql	1-E5ZXDG	There is a problem with GORRSQL and UNION, INTERSECTION, MINUS with column alias while getting ORA-00904 - GOKISQL.
guapswd.fmb	1-I52TKR	When you are changing a password, the Site Map and Products pull-down menu displays, “*WARNING* The menu entered is valid but is not included as part of a personal or product menu.”
guivers.fmb	1-HY1ID3	A mechanism was provided that quickly determines if the Database Extension Utility has been applied to a schema. The patch p1-hy1id3_gen8040002 was delivered on February, 11, 2011.

The logo consists of a horizontal bar divided into two sections: a black section on the left and a blue section on the right. Below the bar is a decorative row of small, multi-colored rectangular blocks. The text "SUNGARD HIGHER EDUCATION" is centered horizontally across the bar.
