<b>Introduction</b> . . . . .	<b>.5</b>
<b>System Requirements</b> . . . . .	<b>.5</b>
<b>Section 1 RPEs</b>	
Display VPDI and FGAC Code (1-430LSP and 1-XVB3R) . . . . .	.7
New parameters . . . . .	.7
Security (1-316F07). . . . .	.8

### **Section 2 Problem Resolutions**

# Introduction

---

This release guide documents Release 8.3.1 of the Banner Web Tailor System. Release 8.3.1 includes RPEs and problem resolutions.

# System Requirements

---

You must install the following minimum releases to upgrade to Banner Web Tailor 8.3.1:

- Banner General 8.3.1
- Banner Web Tailor 8.3
- b\_0110\_twb8030001
- b\_0110\_twb8030002
- b\_0410\_twb80300
- b\_0610\_twb8030004

 **Note**

Ensure that you install these releases in the order listed in this section. ■

# 1 RPEs

The following RPEs are delivered with the 8.3.1 release.

## Display VPDI and FGAC Code (1-430LSP and 1-XVB3R)

twbkwbi1.sql  
twgbparmi\_080301  
.sql

RPEs 1-430LSP and 1-XVB3R requested that the two messages in the `wtailor.twbkwbis` package, should be institutionally controlled or configured.

- Under the Personal Information tab in SSB a message states *Your Institution is...* which is followed by the VPDI code (not the description) associated with the WWW\_USER login used for Self-Service.
- When FGAC policies are used for Self-Service users, a message appears that states *FGAC Policy exists for...* which is followed by the user name.

In both these cases, the messages are ambiguous and does not say what is being done behind the scenes. The users are not allowed to control what should be displayed or not. The VPDI code being displayed was not descriptive enough to inform the users of their Institution name. Even when the description was displayed, the users did not know that VPD has been applied to the database. The FGAC message did not provide any information to the user about what FGAC is or how an FGAC policy might limit their access.

Control values have been provided for each message that allows institutions to choose whether or not to display these messages to Self-Service users. This is helpful for institutions that prefer to display descriptions rather than codes.

### New parameters

Two new parameters have been added:

#### DISPLAY\_VPDI\_CODE

This new parameter has been added with the following values.

Fields	Descriptions
NONE	Do not display anything.
CODE	Display only the code.
DESC	Display only the description.
BOTH	Display both code and description.

## DISPLAY\_FGAC\_USAGE

This new parameter has been added with values *Y* or *N* to indicate whether or not to display the *FGAC Policy exists for...* message.

## Security (1-316F07)

twbkwbi1.sql

While setting up the PIN Preferences in the Enterprise PIN Preferences (GUAPPRF) in INB, the users can choose the number of questions. However, when the users tried to duplicate a question while changing the security question in SSB, they received an error indicating that a duplicate question was not allowed. The users could see only one question displayed, and if they chose a question that they had already saved, they were instructed to choose a unique question.

Modifications have been made so that when the user gets the **Please select a unique question** message, all the other questions the user had previously selected are also displayed.

## 2 Problem Resolutions

This section lists the problem resolutions included in Release 8.3.1. For details about a problem resolution, refer to the `general80301resolutions.txt` file that accompanies this release.

Object	Defect #	Summary
banner-ssb-ws.ear twbksrcl.sql	1-B83E5Q	Find a Page search returns data using baseline records when local records exist.
Cascade.controls.js	1-AUGHH3	Ret_code parameter is ignored by twbkwbis.P_WWWLogin in Cascade UI.
twbklog1.sql	1-CU3E8B	Patch b_0610_tw8030004 and using LDAP causes error "Error occurred during logon".
twbkwbi1.sql twgbparmi_080301_02. sql	1-5CB0QX	The procedure (twbkwbis.p_idm_logout) in Web Tailor is missing.
twbkwbis.sql twbkwbi1.sql Banner Flexible Registration Ear (8.4.1)	1-BMV7VH	Self-Service Banner asks for login credentials with more than one session open at a time.
