# Introduction

---

This release guide documents Release 8.4.1 of the Banner Web Tailor System. Release 8.4.1 includes RPEs and problem resolutions.

## System requirements

---

Before upgrading to Web Tailor 8.4.1, you must install the following minimum releases in the order shown:

1. Banner General 8.4
2. Banner Web Tailor 8.4

## RPEs

---

The following RPEs are delivered with the 8.4.1 release.

### JavaScript files delivered in minified and full versions (RPE 1-C4DGI)

With the Web Tailor 8.4.1, JavaScript files are delivered in minified and full versions for the Cascade theme. A minified JavaScript file is a compressed version of a JavaScript file with audit trails, extra spaces, new lines, and comments removed. The full versions of the JavaScript files have audit trails, extra spaces, new lines, and comments.

As part of a defect resolution for 1-B37AGH, twbkwbi1.sql has been modified to use the minified versions of the .js files. The minified versions are used to improve performance by reducing the file size and allows for it to be downloaded to the page faster. The full versions can be used to troubleshoot problems.

Web Tailor 8.4.1 uses the minified version of the JavaScript files by default. For users who want to use the full versions of the JavaScript files, the Web Tailor parameter UI\_MINIFY has been added that allows users to switch between the minified and full versions. The UI\_MINIFY parameter is not delivered with Release 8.4.1, but it can be added manually through the **Web Tailor Administration** tab. When the UI\_MINIFY parameter is set to *Y* or if the parameter does not exist, the minified JavaScript files are used by Cascade. If the parameter is added and is set to *N*, full versions are used by Cascade.

In Release 8.4.1, minified versions have "-min" appended to the full version name. Before Web Tailor 8.4.1, minified versions were delivered without "-min" appended to the file name. For example, a cascade.controls.js file was delivered, the content was minified, and no full version of the file was delivered. In Web Tailor 8.4.1, cascade-controls-min.js is delivered as the minified version, and cascade-controls.js is delivered as the full version.

 **Note**

For Release 8.4.1, JavaScript names now contain a dash (-) instead of period in order to support a VMS environment. Before Web Tailor 8.4.1, JavaScript files had a period in the name. For example, cascade.controls.js has been renamed to cascade-controls.js. ■

The following table describes the full versions of JavaScripts that have minified files associated with the full versions.

Full version	Minified version
cascade-controls.js	cascade-controls-min.js
cascade-ext.js	cascade-ext-min.js
cascade-parser.js	cascade-parser-min.js
cascade-utils.js	cascade-utils-min.js
common-controls.js	common-controls-min.js
common-navigation.js	common-navigation-min.js
common-integrate.js	common-integrate-min.js
common-platform.js	common-platform-min.js
udcxml-service.js	udcxml-service-min.js
bdms-parser.js	bdms-parser-min.js

## Improved Cascade Search Results window (RPE 1-DEWUE5)

For a Search Results window based on the Cascade theme, the window will be sized to fit the information displayed. Before Web Tailor 8.4.1, a Search Results window that was based on the Cascade theme limited the information displayed.

# Problem resolutions

The following problem resolutions are delivered with this release.

## Note

For comprehensive and detailed problem, impact, and resolution information for all defects corrected in this release, refer to the supplemental problem resolutions file (`wtlweb80401resolutions.txt`) delivered along with your release guide. The information in this text file is extracted directly from the Customer Support Center just prior to release of the product and may include additional defects that were resolved after this document was finalized.

Object Name	Defect #	Summary
<code>cascade.css</code>	1-EMYGY1	The page displays a red underline after clicking on the comment.
<code>cascade-controls.js</code> <code>cascade-controls-min.js</code>	1-B4OHQA	Links that are added to the homepage do not work with Cascade UI.
<code>cascade-controls.js</code> <code>cascade-controls-min.js</code>	1-B5UNUA	For Banner Self-Service using Cascade, there is a problem when a user resizes the browser.
<code>cascade-controls.js</code> <code>cascade-controls-min.js</code>	1-E0HUQP	For Student Self-Service using Cascade, the Account Detail by Term page does not display the ID, Name, and Date/Time.
<code>cascade-controls.js</code> <code>cascade-controls-min.js</code>	1-FFP4CR	In Cascade, the Main Menu items is not displayed correctly when the Link Text and Description has HTML tags.
<code>cascade-controls.js</code> <code>cascade-controls-min.js</code>	1-FG3A7X	The help images do not display in Cascade.
<code>cascade-controls.js</code> <code>cascade-controls-min.js</code>	1-G4RAXV	A Menu Item cannot be accessed with more than one ampersand in URL text.
<code>cascade-controls.js</code> <code>cascade-controls-min.js</code> <code>common-platform.xml</code>	1-DEWUE3	Label “Home” on main menu pages is not displayed in English.
<code>cascade.css</code>	1-D711GF	There is “The file does not exist” error for the <code>success_new_cascade.png</code> file.
<code>cascade.css</code>	1-F510D7	The scrollbar is not rendered for certain dropdown boxes in Firefox using Cascade.
<code>cascade-parser.js</code> <code>cascade-parser-min.js</code>	1-D0A3XO	Anonymous Self Service Cascade UI pages do not display the page title.

Object Name	Defect #	Summary
cascade-parser.js cascade-parser-min.js	1-DD1H1R	Information Text on the Application Page is displayed differently to secure users and non-secure users.
cascade-parser.js cascade-parser-min.js cascade-controls.js cascade-controls-min.js	1-CU1KD4	JavaScript cannot be used in a file assigned to a help link.
twbkwb11.sql cascade-controls.js cascade-controls-min.js udcxml-service.js udcxml-service-min.js	1-B4RT2R	“Break in attempt has been detected” functionality is not working.
cascade-utils.js cascade-utils-min.js cascade-controls.js cascade-controls-min.js	1-DOWM78	While resizing Windows for web pages on the unsecured side, the entered data is lost.

Object Name	Defect #	Summary
cascade-controls.js cascade-ext.js cascade-parser.js cascade-utils.js common-controls.js common-navigation.js common-integrate.js common-platform.js udcxml-service.js bdms-parser.js serviceProperties.js bdms.css cascad1.common.css cascade.css cascade-luminis.css cascade-print.css common-controls.css common-platform.css ie6.css ie7.css ie-rtl.css ie8.css login.css rtl.css app-overrides.css jquery.autocomplete.css cascade-controls-min.js cascade-ext-min.js cascade-parser-min.js cascade-utils-min.js common-controls-min.js common-navigation-min.js cascade-integrate-min.js common-platform-min.js udcxml-service-min.js bdms-parser-min.js twbkwb11.sql ewkwrsl1.sql	1-B37AGH	Cascading style sheets or JavaScript files have no audit trails for the Web Tailor 8.3 release.
twbklog1.sql twbkwb11.sql	1-I20BM4	Users are unable to troubleshoot the “Error occurred during logon” message during login processing.
twbkwb11.sql	1-C52F2Z	Users may receive an HTTP 404 error when going to the homepage.
twbkwb11.sql	1-EAHVWV	When accessing Banner Self-Service from Luminis and Web Tailor 8.3 is set to the Cascade UI, the Luminis style sheets are not being used.
